

# Kieran Lewis

## UI / UX Designer

With a mix of creativity and technical skills, I've built a portfolio that highlights my focus on visual quality and user-friendly design. My journey in this field started with an Art & Design Foundation at the University of Wales Trinity Saint David, which set the stage for my growth in design and development. Along the way, I've gained valuable experience in various roles, including management in hospitality, where I developed strong leadership and customer communication skills which has proven to be a big asset in my recent work alongside some big name companies.

Now, as the Lead Creative Coordinator at Vindico ICS Ltd, I lead design projects spanning UI/UX design to responsive web development, consistently pushing creative boundaries since I joined in April 2016. Before this, my role as a Graphic Designer for Scarlets Rugby allowed me to combine my love for sports with design, contributing to impactful branding and fan experiences. My early roles as a Bar Manager and Catering Manager at Square And Compass and the National Botanic Garden of Wales gave me solid experience in team leadership and operations.

I'm skilled in a range of design and development tools such as Figma, Photoshop, Illustrator, and front-end development languages like Vue JS and Vuetify. This technical expertise supports my creative work, which covers everything from web design and video production to brand building and photography.

Whether I'm creating easy-to-use interfaces or engaging video content, my aim is to deliver fresh ideas that connect with people and boost engagement. I pride myself with having a strong eye for detail and a passion for innovation, I'm always looking for new challenges and ways to bring unique stories to life through design and technology.

### I'm open to learning new skills...

Even though I've been very fortunate to have worked on several different projects across different industries and mediums, I'm always on the lookout for opportunities to expand my skill set by throwing myself into the unknown and giving something completely new a go! So no matter what the project, I'm always willing to give it everything I've got and happy to put the hours into mastering that particular skill!
