Chinese-Native

SUMMARY

Human-Centered Innovation

Merging technology with empathetic design. Focused on intuitive interactions that elevate both functionality and the user's emotional experience.

Prototyping & Engineering

Translating abstract concepts into tangible products. Utilising versatile modeling tools and practical engineering methods to build functional prototypes efficiently.

Collaboration & Communication

Aligning design and engineering goals. Driving projects forward through clear communication and tight coordination across diverse departments.

EXPERIENCE

Product Design Intern - Harman International, Harman Kardon Design Team

May 2025 - Dec 2025 | Shenzhen, China

Contributed to next-generation Harman Kardon audio product development, including a speaker scheduled for launch in September 2026, with a focus on form exploration, transparency-based lighting systems, and advanced CMF proposals.

Refined product details with a production-minded approach, collaborating with engineering, acoustics, and suppliers to support feasible manufacturing solutions.

New Balance Sponsored Studio - ArtCenter College of Design

2025 Spring Term | Los Angeles, CA

Collaborated with New Balance to develop forward-thinking product solutions, integrating brand identity with user-centered innovation. Conducted user research and built physical & digital prototypes to present final concepts to the New Balance design team.

Sneaker design gallery showcase - ArtCenter College of Design

Oct 2023 | Los Angeles, CA

Sneaker design selected for display in the president's office. And interviewed by the president of ArtCenter, posting a video of the interview to the president's official Instagram account.

Teacher Assistant - ArtCenter College of Design

Assistant in Product Design 2

2022 Fall Term | Los Angeles, CA

Guided students through demo speedform sketches, 3D modelling challenges and provided professional critiques.
