

David Chia

Product Designer/UX-UI Designer/
Framer developer

+34 609856486 [Portfolio](#) [Linkedin](#)

I'm David Framer, a product designer and developer with a strong background in graphic design, communication and UX/UI design. I look for interesting projects to contribute to with a user-centred perspective and clear business objectives. I am a passionate and curious person who likes to understand design beyond a job. Currently I would like to specialise in product design through data.

Profesional experience

Product designer & Framer developer

January '24-Present
