SUMMARY

Product Designer with 6+ years specializing in complex enterprise SaaS platforms, turning dense, multi-system tools into clear, usable interfaces. Experience spanning control-plane design, government services, and brand work, owning the full process from research through delivery.

SKILLS

Design: UX/UI Design, Interaction Design, Visual Design, Wireframing, Prototyping, User Flows, User Journeys, Information Architecture, Design Systems

Research: User Research, Stakeholder Interviews, Contextual Inquiry, Usability Testing, Persona Creation, Task Analysis, Heuristic Evaluation

Brand & Illustration: Brand Identity, Storyboarding, Illustration, Mood Boards, Brand Collateral, Brand Guidelines

Tools: Figma, Adobe Illustrator, Adobe Photoshop, Adobe InDesign

EXPERIENCE

Coforge | Product Designer

May 2024 – Present | Pune, India

- Lead design for onboarding enterprise applications and services onto the TIBCO Control Plane, including TIBCO BusinessWorks 5 (BW5) and BusinessWorks 6 (BW6).
- Design provisioning, modification, and management flows for new and existing services to ensure seamless operation and scalability across the platform.
- Own interaction design and visual design from requirements through delivery, partnering with product managers and engineering.

Cloud Software Group | Product Designer

May 2023 – May 2024 | Pune, India

- Contributed to the launch of a new Control Plane for the TIBCO Platform, enabling IT operations teams to monitor and manage multiple TIBCO solutions from a single interface.
- Led design from requirements gathering through interaction design and visual design, ensuring seamless functionality and a cohesive user experience.
- Conducted user research and produced documentation to validate design decisions.

HCL Tech | UX Designer

October 2020 – April 2023 | Bengaluru, India

- Delivered the DartCharge toll platform for UK Government transport systems (gov.uk), covering user research, design, and task delivery.
- Conducted user and stakeholder interviews, contextual inquiry, affinity mapping, persona creation, task analysis, and market analysis to inform design.
- Performed heuristic and UI evaluations and led native mobile application conceptualization and design, collaborating with project managers, developers, and stakeholders.

Clirik Technologies | Graphic Designer

June 2017 – January 2018 | Nagpur, India

- Delivered logo design, branding, brochure design, and website mockups for a range of clients across industries.
- Produced social media creatives, brand collateral, and brand guidelines, and collaborated with developers to ensure accurate implementation of designs.

EDUCATION

Master of Design, Communication Design | IDC, IIT Bombay

Bachelor of Engineering, Computer Science and Engineering | DMIETR, Wardha
