

Work weightless.

The fully-equipped reclined workstation — every add-on included, wrapping multiple monitors, laptop, keyboard and mouse around your body in zero-gravity neutral posture.

LEVUS Ultimate is an adjustable, reclined workstation that places monitors, laptop, keyboard and mouse around the user for comfortable work in a zero-gravity neutral body posture. It reduces vertical spinal pressure, distributes body weight along the entire body length, and opens the hip-spine angle to 120° — for sustained, focused computer work without back, neck, arm or eye strain.
