

BELOW GRADE WATERPROOFING

Protect from the Ground Up —Top-Tier Below-Grade Waterproofing Solutions

Below-grade waterproofing in restoration projects aims to address and repair water damage that has already affected the foundation and surrounding areas. This is crucial for preventing further deterioration and ensuring the long-term stability of the structure.

Effective waterproofing helps to seal out moisture, preventing new water infiltration and safeguarding the restored areas from future damage.

What to look for—

- ✓ Foundation Cracks
- ✓ Persistent Dampness
- ✓ Water Stains
- ✓ Structural Damage
- ✓ Mold and Mildew Growth:
