

## **WHAT SHOULD I DO FOR HOMECARE AFTER MY TREATMENT?:**

- After PicoWay treatments, your skin may remain red for a few hours.
- Avoid scrubbing or irritating the skin for a few days.
- You may notice darker spots peeling or falling off at the treatment site.
- Some patients may notice a temporary lightening or darkening of the skin, which should resolve to normal pigmentation over the next few weeks post-treatment.
  - This is a normal response to the PicoWay treatment.
- After treatment, freckles, birthmarks, age spots, and other blemishes should be reduced or eliminated, but may require multiple treatments as recommended by the provider.
- **Apply a mineral-based sunscreen daily post-treatment.**
