# Get even more functionality with RealWear Cloud.

Boost your team's productivity with RealWear's cloud-based control suite.

Get the most out of your devices.

There's a whole host of benefits to managing your RealWear devices centrally. Whether updating the firmware on a fleet of units at once to analyzing which apps are best utilized, RealWear Cloud saves time and money - helping you get the most ROI out of your RealWear equipment.

|					
Analyze and utilize device data	Provide real-time technical support	Secure and lockdown devices for enterprise	Remotely manage connectivity	Discover granular device controls	Deploy and manage updates and apps

Gain better insights, control, and decisions.

Get a global view of your deployment. Analyze your device performance and user adoption, reduce support requests, troubleshoot issues easily, and remotely update apps and firmware.

Easily customize your team's device experience.

Tailor the perfect user experience for your team's needs. Select apps and features and deploy them at a device, group, or global level. You can customize the home screen, update settings in *My Controls*, and more.

Unlock the tools for your team to do more.

Get connected easily with Wi-Fi Management, instantly share images and documents to OneDrive with Cloud Sync, and streamline device usage with Kiosk Mode.
