Introduction

Our range of Luxury Edition safes is the result of our passion for what we do and our more than forty years of experience manufacturing security elements for companies and individuals.

Every day, we improve our safes to meet the highest standards of security and always offering the highest quality. Our motivation has always been to protect what have an incalculable value, those objects whose sentimental value makes them irreplaceable, regardless of what it is: jewellery, fountain pens, watches, etc...

In this exclusive range of safes, we have selected the most exquisite interiors and finishes, making them unique luxury pieces.

Their carefully chosen designs and materials, worked down to the last detail, elevate Ferrimax Luxury Edition safes to the level of what they hold inside.

*Luxury and safety united in
an exclusive product range*

A unique space in the heart of Barcelona

Our showroom located in Barcelona offers us an exclusive environment in which the customer can choose all the details of their safe.

A unique space with architectural elements characteristics of the area, with great visual and cultural value, which gives to it a lot of character.

On the main floor of the local there is an exhibition area where you can know each pieces that make up the collection. We have also created a Customer Experience area, where you can configure them according to your personal needs, style or preferences, and see samples of all the customisation options available.

Finally, we have a more versatile space in the basement, where you can hold meetings or even relax in the lounge area.

Traveler

Traveler

Traveler by Colección Alexandra

The Traveler high security safe is unquestionably a luxury piece of jewellery made with handcrafted methods and using the highest quality materials.

A collaboration with our partner *Colección Alexandra*, which makes Traveler a masterpiece of design and elegance.

A masterpiece in terms of design and elegance

Traveler

The perfect fusion between security and elegance

EXCLUSIVITY AND CUSTOMISED DESIGN

The Traveler safe allows you to personalise the interior configuration and the exterior plating, adapting perfectly to any of our customer's needs.

The interior drawers can be configured with different storage compositions to accommodate all types of contents, such as jewellery, watches, money, weapons, documents and other precious objects.

SECURITY

The Traveler safe has been developed according with the security standard for safes EN 1143-1, obtaining the security Grade IV. Incorporates an electronic locking system and a Class B EN-1300 key lock. Also available with delay locking function.

rendo

zendo

Zendo

The Zendo certified safe is characterised by its high level of resistance and security against burglary.

With its elegant and modern design, each safe is a unique and essential element to protect your most special objects.

Protect your most
precious values

Safety and luxury united in one exquisite piece

The Zendo safe is certified in accordance with current security standards, making it a practically impenetrable safe.

All models are certified according with the EN 1143-1 standard, which classifies the degree of burglary resistance of safes, meeting the requirements for grades III or IV and being certifying by external certified bodies.

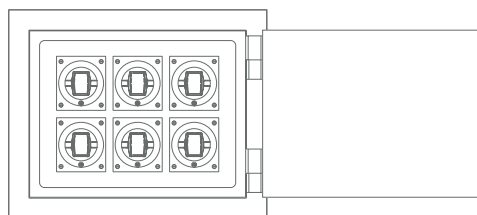

They also include in their design other security elements that further increase their resistance, such as anti-drilling protection in the mechanisms, bolts, relockers and certified high security locks. Finally, their hinges are anti-picking and, in case of direct attack, they block the door and prevent it from being opened.

Zendo

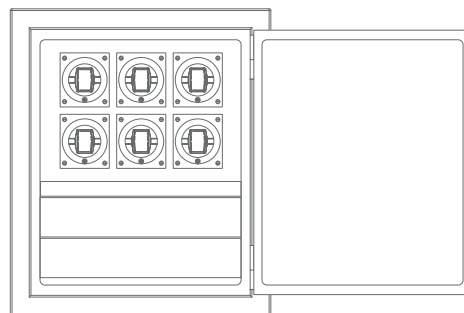

MODELS

Zendo S

6 modules

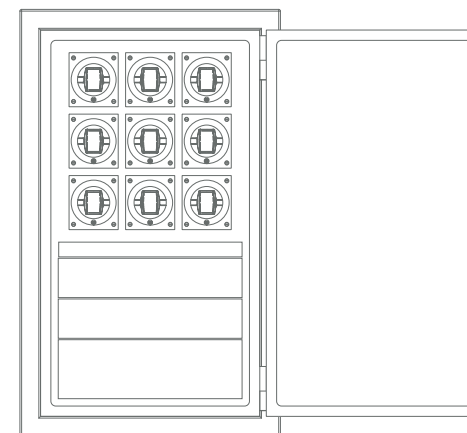

525 x 425 x 415 mm (width, height, depth)

Zendo M

6 modules
1 shelf and 2 drawers

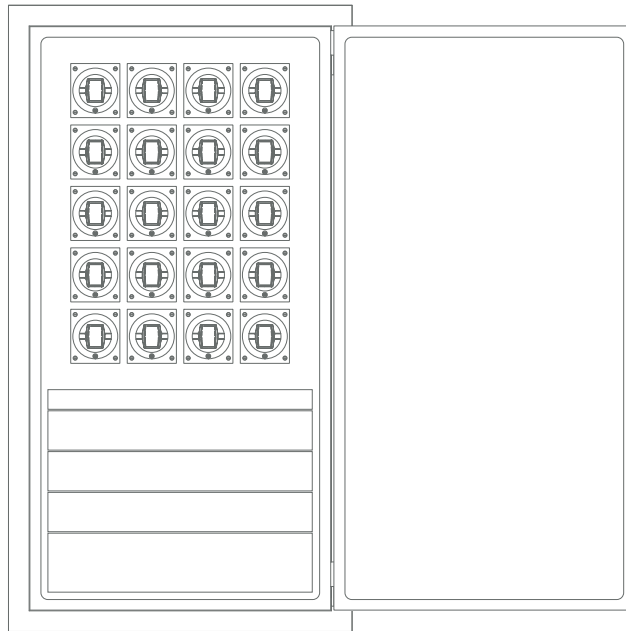

535 x 625 x 470 mm (width, height, depth)

Zendo L

9 modules
1 shelf and 3 drawers

530 x 870 x 500 mm (width, height, depth)

Zendo XL

20 modules
1 shelves and 5 drawers

695 x 1.270 x 590 mm (width, height, depth)

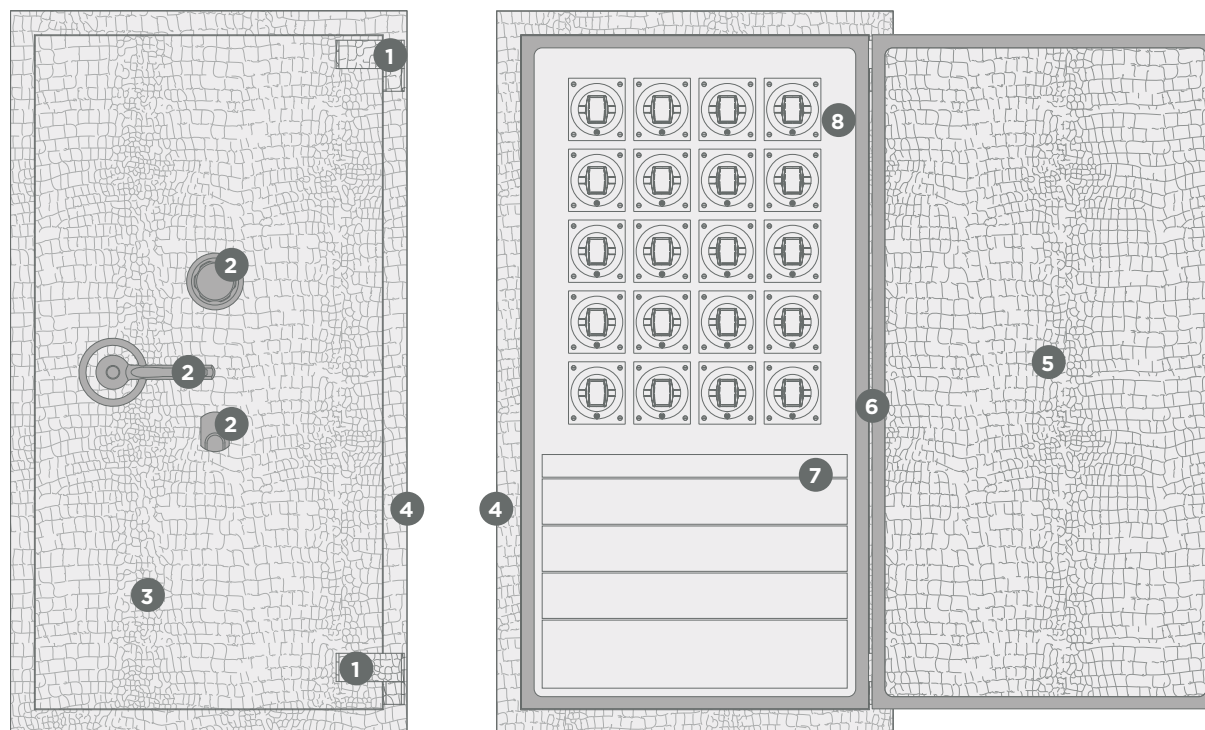

CONFIGURATION AND CUSTOMISATION

The Zendo serie is very versatile and can be adapted until the last detail. In terms of exterior finishes, it is possible to apply leather, paint or wood (see page 53).

As for the interior configuration of the space, it is fully customisable in all the models, allowing the insertion of automatic rotor modules for watches, modules for displaying jewellery, drawers with a personalised interior layouts (see page 49) and with standard or double capacity, as well as practical trays in which to deposit the pieces while the case remains open.

The safe allows customisation of all these components and also exterior and interior finishes.

Lira

Lira

Lira is a practical, lightweight watch and jewellery safe, designed in vertical format, ideal for displaying your most precious goods.

Its exclusive and timeless style joint to its slim shape, turn itself into a decorative element perfect for any environment.

Can't hide the passion and enthusiasm
for jewellery and watches

Lira

An exclusive piece that will be part of the decoration

The Lira range has been designed with a slight tilt for easy viewing and handling its interior.

The different models have a specific number of modules that can be fully customised, with a choice of drawers, static supports or motorised rotors for watches.

The version with a glass door (optional) allows to display the contents as if they were a piece of art.

DETAILS THAT MATTER

Unique pieces have a higher value. That's why Lira allows you to personalise the lock trim and engrave your initials on it.

ALWAYS IN MOTION

Its modular configuration allows the installation of automatic winding chargers for wristwatches to ensure that your mechanisms are never interrupted.

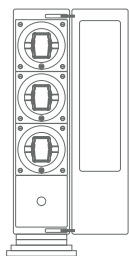

OWN SHINE

Make your pieces stand out with the interior lighting included in all our Lira safes. It also allows you to adjust the level of warmth and activate the light by remote control.

CONFIGURATION

Configurable structure, composed by modules of four and with one or two columns wide. Infinite combinations turning it into a perfect complement for your room.

argia

argia

Argia

The Argia safe is all about light.

Its distinctive glass door, it allows to display the jewellery and watches inside.

It has a LED system that lights up when the door opens and an interior dehumidification system working with a controlled heat emission.

It is available in three sizes, all of them with a flexible composition inside, which configures the interior as desired. The exterior finish is made to order according to the customer's requirements, either in leather, wood or painted (see page 53).

A safe with character

Argia

A combination of beauty, aesthetics, exclusivity, comfort and luxury

SECURITY

The Argia security safe is exclusive and handcrafted. As well as being very comfortable and practical, it has all the necessary features to store and display your values with security, confidence and total calm.

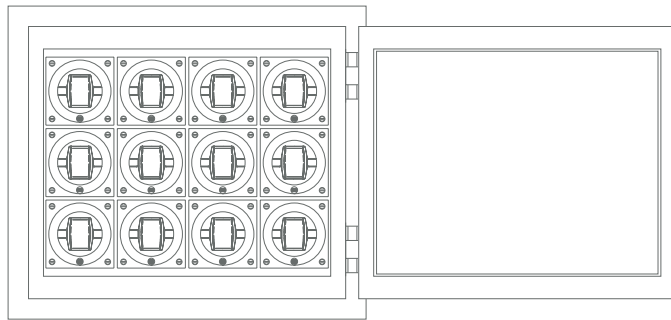

It incorporates an automatic relocking system as additional protection in case of direct attack, and an automatic locking system for the locking bolts, so as not to damage the door in case of accidental closure (when they are open).

It is provided by a key lock in addition to the standard electronic combination lock, and there is also the option of equipping it with a fingerprint scanner.

CONFIGURATION

The modular design of Argia series allows the interior to be adapted with multiple possibilities.

Endless possibilities for the interior of the Argia security safes.

finishes

interiors

interiors

Interior finishes

We create safes so that their use is a unique and incomparable experience for each of our customers.

That's why, for us, the fact that you can choose the interior of your safe is an essential requirement for our entire *Luxury Edition* range.

Safes designed and manufactured for you

INFINITE POSSIBILITIES

The interior of the safes can be configured with different modules depending on the model.

The Lira and Argia ranges start with a 10 x 11 cm cubic unit, in which a fixed display (either for watches or jewellery), a motorised automatic watch winder or a drawer can be placed. The combination of two widths of the base module allows trays for writing, jewellery or watches, or a double drawer (figure A).

For the Zendo range, the freedom is even bigger, adapting the width of the modules according to the model of case and allowing the drawers to be completely removed, for example, or mixing different heights, incorporating glass trays, mirrors, rotors...

In all our models, the interiors of drawers and trays are fully customisable (figure B).

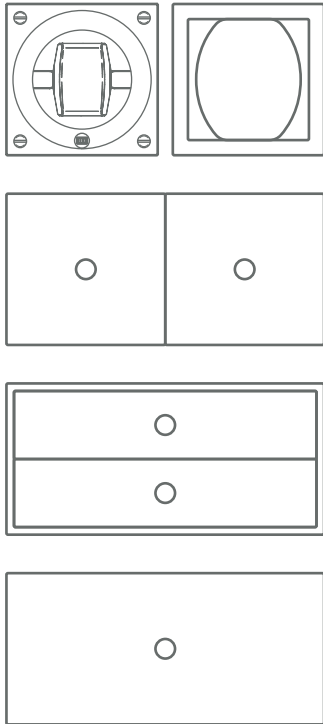

FIGURE A

Exterior finishes

LACQUER FINISH

We have designed an exclusive range of lacquers and special finishes to turn safes into unique pieces.

Our paint finish is made with liquid paint of synthetic origin applied with a high-precision airbrush. Once applied, the paint is stabilised on the surface of the piece which, when dry, gives it an exceptionally smooth and resistant finish.

The final polishing and waxing of each safe is carried out by hand with extreme care and attention to detail to ensure a luxurious image.

LEATHER FINISH

Leather is very present in watches and fashion accessories (for men and women).

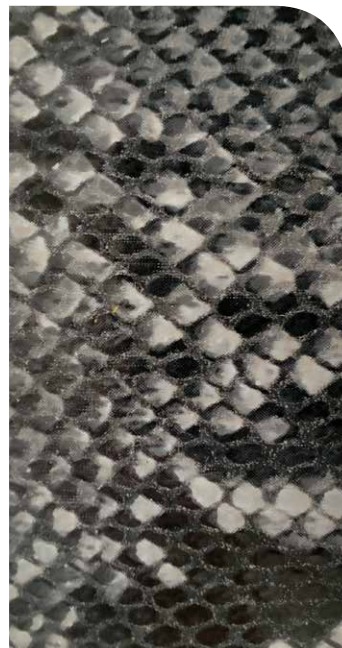

Working with leather is an age-old, meticulous and totally hand-crafted practice that, in addition to giving the piece an exclusive, high-quality finish, gives it an unequalled feel and warmth, which transforms it into a very special piece.

All our products can be leather-lined, with 30 different finishes and their respective combinations between them and with other materials.

WOOD FINISH

Thanks to the tone and shape of the wood grain, this finish brings warmth to the safes and gives them a completely new look, leaving behind the coldness of the steel from which they are made.

The lining process is complex, as every last detail is taken into account to ensure an excellent result.

The application of the wood can be done at exterior and interior of the safes, allowing the combination with other materials.

locks

locks

Locks

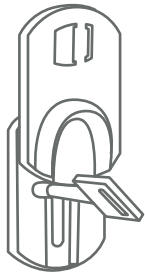

There are different locking systems available, which can also be combined with others,

From conventional mechanical key systems or electronic systems (such as code combinations) to sophisticated biometric systems.

All of them are certified according to the current standards and guarantee maximum security.

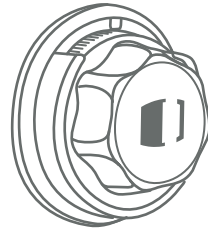

MECHANICAL AND ELECTRONIC SYSTEMS

KEY LOCK

The most extended and reliable system.

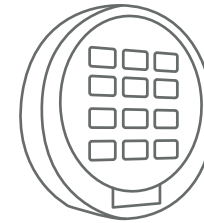

Available with different types of keys (interchangeable, single blade, double blade...), according to EN 1300 standard.

COMBINATION DISC MECHANICS

Along with the key, it is the mechanical system by excellence.

It can have 3 or 4 discs, which increases the length of the combination, also increasing the degree of security.

ELECTRONIC COMBINATION

A reliable and convenient system, which works with a numerical pin.

The code is unique and can be reset if necessary. Various models and finishes are available.

BIOMETRIC SYSTEMS

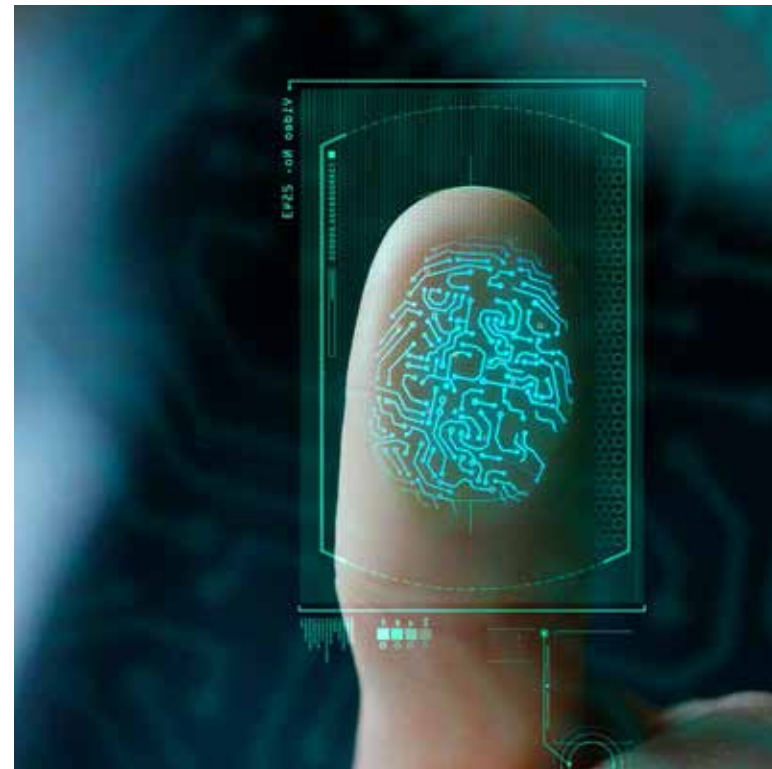

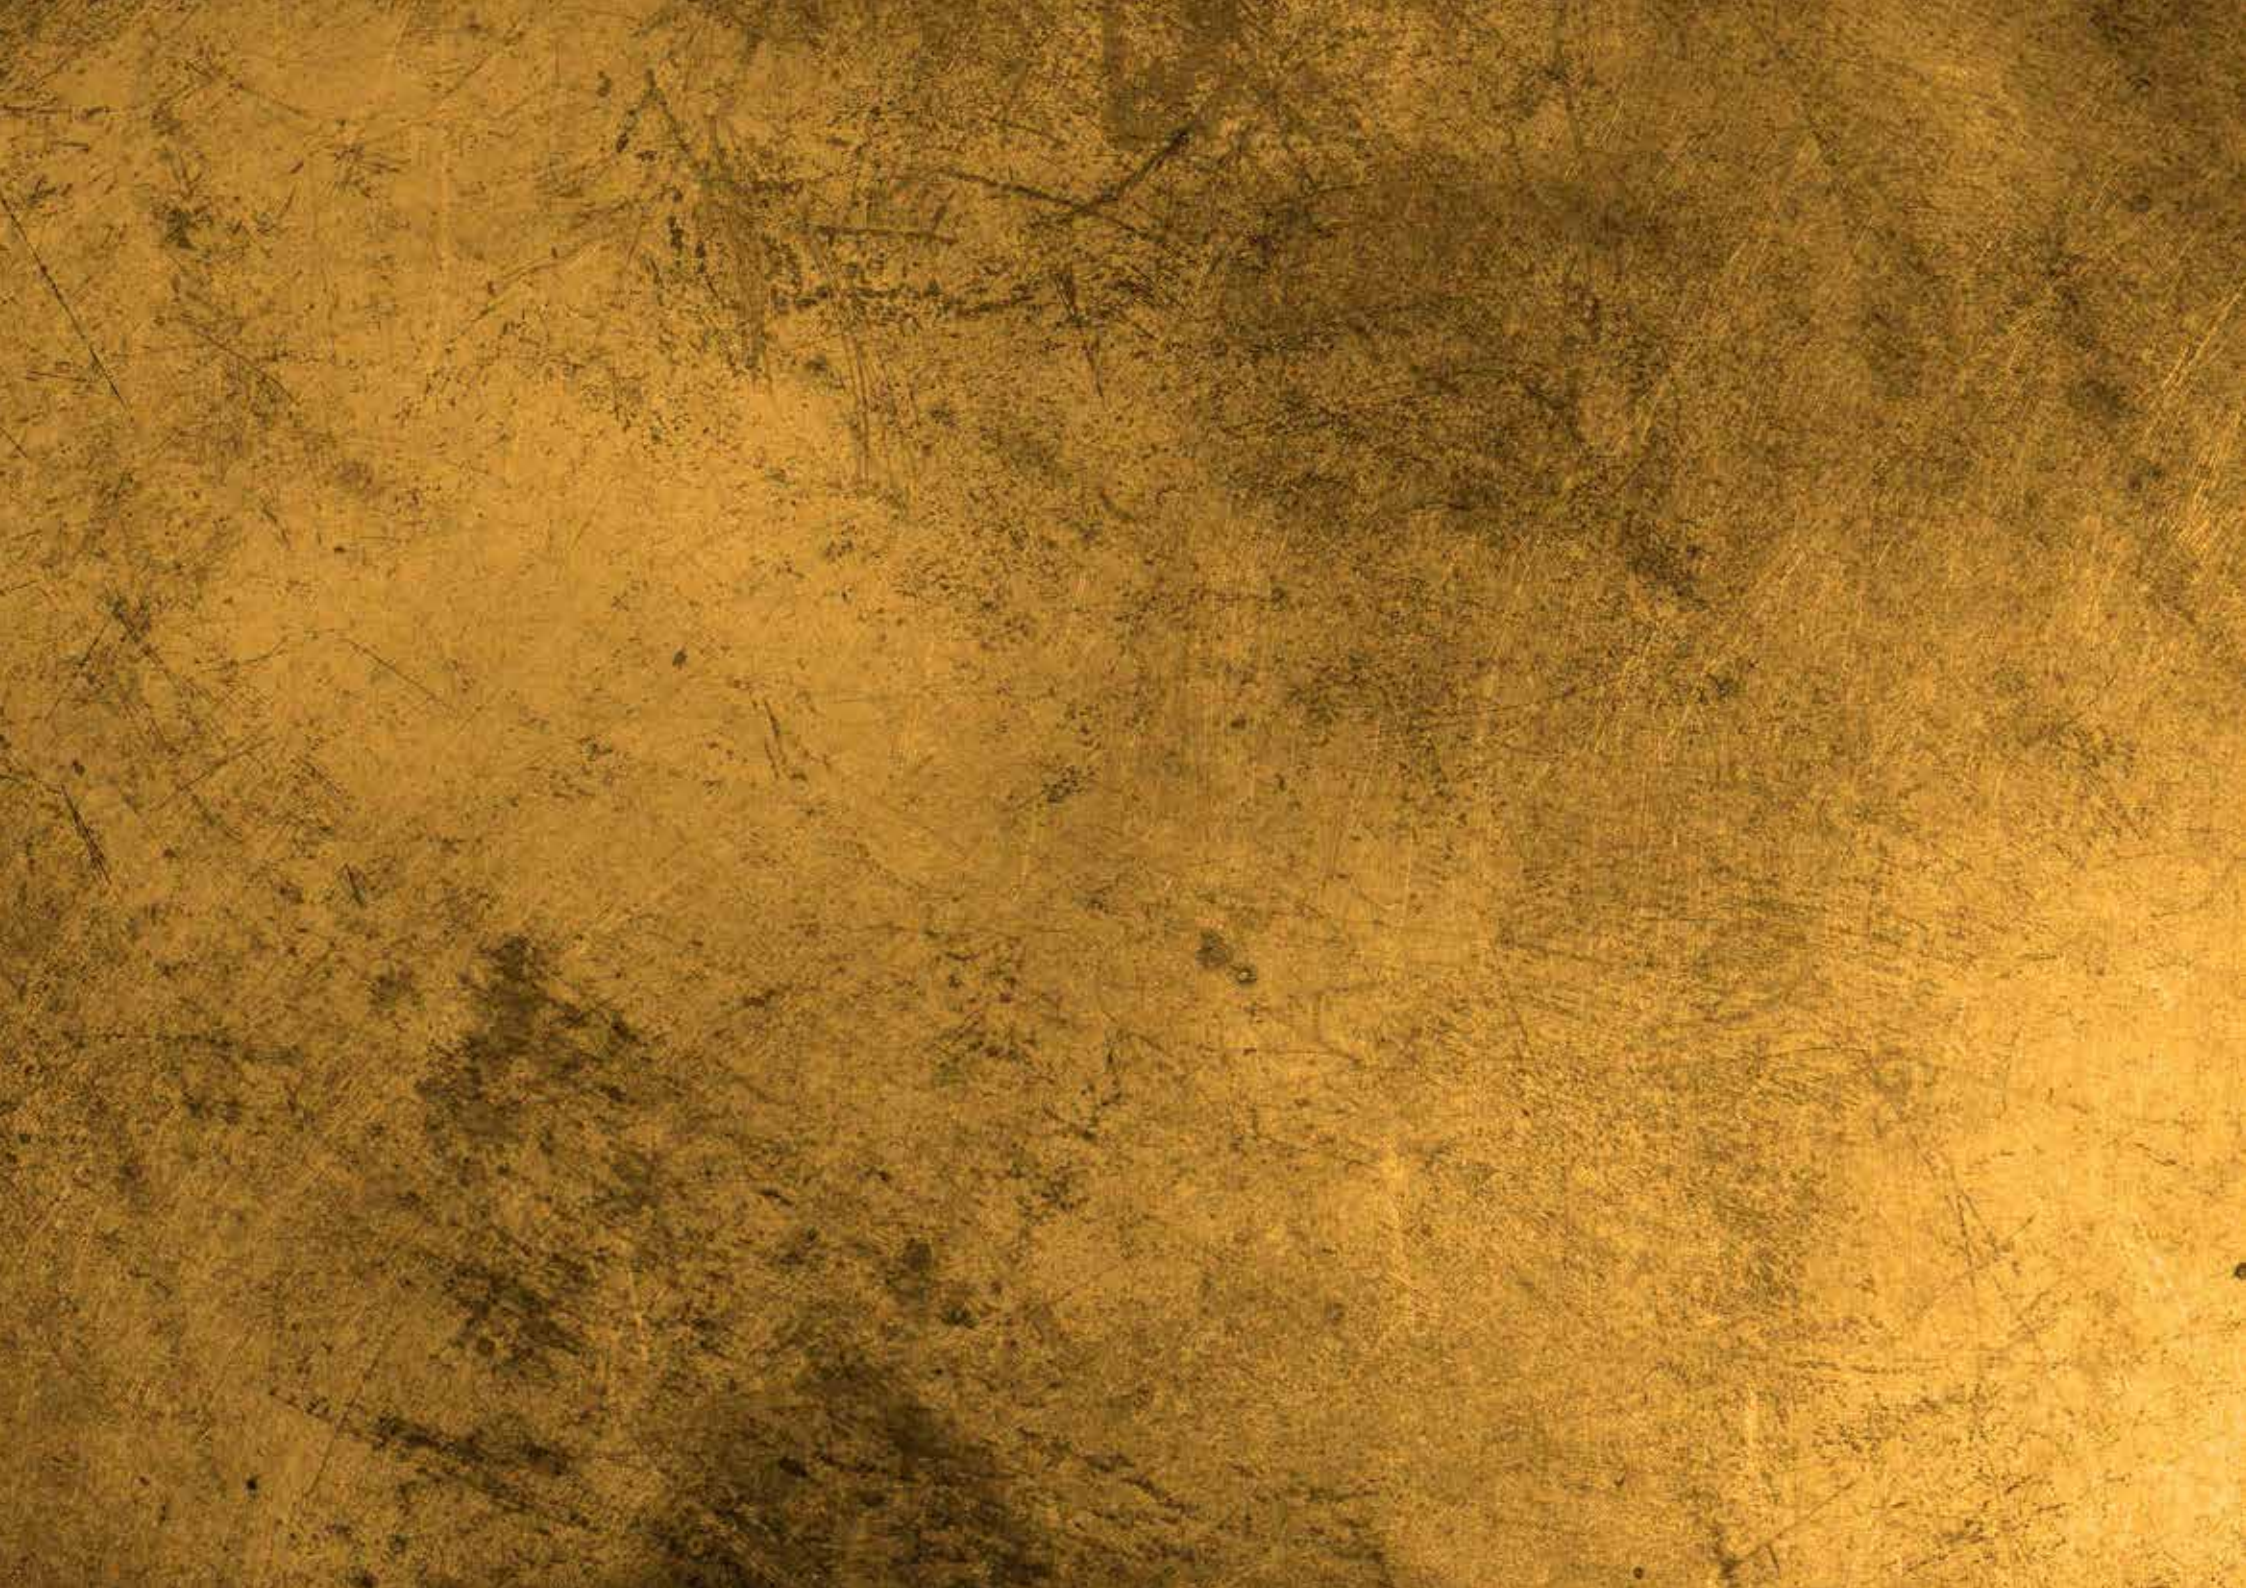

Biometric systems allow opening by scanning a biological element. These are usually eye iris, fingerprint, facial or palm venous system scanners.

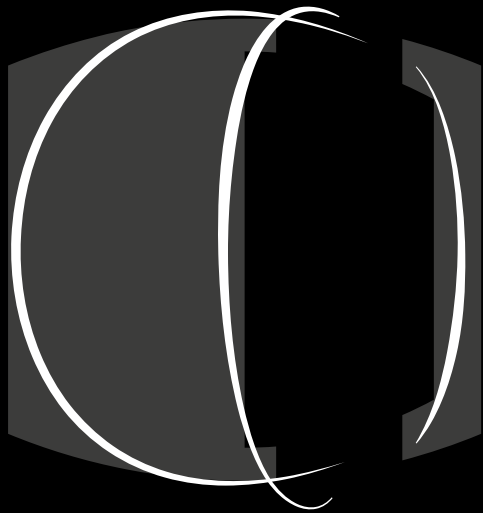

Such advanced electronic systems offer additional protection as they are a non-transferable methods of access (although they allow multiple user registration).

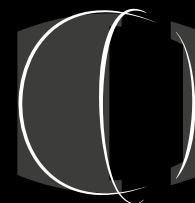

In addition, many of these systems minimise physical contact and also are very useful, fast and comfortable.

The most advanced and secure technology for your safe
