

PRACTICAL CURRICULUM · SKILLS LAB & SIMULATION · 18 MONTHS

NURSING & HEALTH CARE

A complete, practice-based training programme for basic nursing care, from safe fundamental skills through to the practical examination.

Learning takes place on the simulator, on the model and on the case.

THE PROGRAMME

Safe nursing care can be learned. This programme builds that ability, from the first procedure to the examination.

Nursing & Health Care is a practice-based 18-month programme for basic nursing care, built around a modern skills lab with simulation. More than thirty competency modules guide trainees through six phases, from fundamental nursing skills through basic and treatment care to emergency management, nursing across different stages of life and professional qualification.

The focus is on practice throughout. Learning takes place on the simulator, on the anatomical model and on standardised cases, with around 150 assessed skills-lab exercises and one OSCE station per module.

Each module concludes with an assessed OSCE station and a learning assessment, so that competency is demonstrated through real practice rather than on paper. Ten additional modules deepen individual specialist areas as required.

The programme is available as a curriculum, as a matching equipment specification or as a turnkey package for your site.

EQUIPMENT

Equipped for the skills lab.

01

Simulation & Training Manikins

Skills trainers plus mid- and high-fidelity simulators for realistic scenarios.

03

Nursing Bed, Mobilisation & Transfer

Nursing beds, lifters and transfer and positioning aids for kinaesthetic working.

05

Injection, Infusion & Medication

Injection and puncture trainers, infusion technology and models for medication administration.

07

Hygiene, PPE & Reprocessing

Personal protective equipment, disinfection and equipment for storage and reprocessing.

02

Vital Signs & Monitoring

Blood pressure, pulse, SpO₂, temperature and patient monitors for assessment.

04

Wound Care & Dressing Technique

Wound models, sterile dressing material and instruments for wound care and dressing changes.

06

Emergency, Resuscitation & Oxygen

BLS manikins, AED trainers plus ventilation and oxygen equipment for acute situations.

08

Debriefing & AV Technology

Camera, recording and debriefing technology for structured debriefing.
