COMPREHENSIVE ORTHODONTICS

EDE *

Tailored for OHTs

20 CPD

Paediatrics

- Growth & development
- Habits management
- Early intervention
- Appliances
 - e.g. expanders
- Lip/Tongue ties

Airways & Sleep

- For airways & sleep:
- Assessment
- Coordinate Tx
- Consequences on growth & quality of life
- When to refer to ENT

Adults

- Tx options
- Exo vs non exo
- Tx stages for aligners & braces
- Complications
- Review management

Dx & Tx Planning

- Case assessment
- Records taking
- Photos, scans etc
- Coordinating with team for Tx planning

Hands On

BRACES

Place:

- Brackets
- Molar tubes
- Powerchains
- Open coil springs
- Ties: simple & figure 8
- Wire ligatures
- Bite turbos

ALIGNERS

- Place attachments
- IPR

RETAINERS

- Wire retainer placement

Course Goals

By the end of this course, you will be able to:

1

Dx Orthodontic & Airway Conditions

Identify orthodontic issues, airway-related concerns, & sleep-disordered breathing in patients of all ages.

Manage Both Adult & Paediatric Patients

Tailor Tx plans for children, teens & adults, applying age-appropriate strategies throughout their care.

2

3

Perform Key Clinical Orthodontic Tx

Confidently place braces/aligners, manage reviews & perform adjustments effectively.

Coordinate Comprehensive Tx Plans

Manage Tx from early planning to completion including detecting early signs of complications.

4

5

Master Retention & Relapse Prevention

Develop retention plans to maintain results, identify early signs of relapse, and how to manage.

Confidently Communicate Treatment

Explain Tx plans clearly, guide patient expectations, and collaborate seamlessly with patients, dentists & specialists.

6

Course Program

Day 1

▶ **Introduction**

- Importance of orthodontics
- Pathways to achieve treatment goals

▶ **Importance of Airways & Sleep**

- Impacts of poor airway health
- How to assess airways
- How to manage airways

▶ **Habits & Early Intervention**

- Detrimental habits to development
- When and how early intervention is managed

▶ **Deciduous Dentition Development**

- Normal growth and development patterns
- Spacing & missing teeth
- Impacted teeth
- Predictors of malocclusion & how to manage

▶ **Early Intervention Modalities**

- How to manage early signs of poor development
- Space maintenance
- Expanders & functional appliances
- Phase 1 braces/aligners

Course Program

Day 2

▶ **Permanent Dentition Diagnosis**

- Revision of orthodontic Dx criteria
- Assessing difficulty of orthodontic cases
- Assessing risks of orthodontic cases
- Understanding extraction vs non-extraction approaches

▶ **Aligners**

- How aligners work
- Benefits and limitations
- Aligner treatment procedure

▶ **Braces**

- How braces work
- Benefits and limitations
- Braces treatment procedure

▶ **Hands On Aligner Practice**

- Attachment placement
- IPR (with bur)
- Retainer wire placement

▶ **Hands On Braces Practice**

- Bracket placement
- Wire placement
- Auxiliary placement e.g. open coil springs

“

EDE's Comprehensive Orthodontics has set an amazing standard for what should be expected in a comprehensive course and what it should contain.
