

Faisal Rafiq, M.D.

Psychiatrist

Brief Biography:

Dr. Faisal Rafiq, an esteemed psychiatrist since 2008, has made his mark in the field with a broad expertise encompassing medication management and psychotherapy. His career has seen him take on formidable challenges in various settings, including emergency psychiatric centers, crisis intervention services, and as a consultant in medical hospitals. Beyond his acumen in acute psychiatric care, Dr. Rafiq has significantly impacted long-term inpatient treatment centers and rehabilitation programs nationwide. His ability to adeptly manage a variety of psychiatric conditions and his dedication to patient-centered care have established him as a versatile and empathetic figure in his field. In addition to his clinical endeavors, Dr. Rafiq is also a passionate innovator. He is a co-founder of Nextvisit AI, an AI company dedicated to revolutionizing the field of psychiatry. Currently, he is focused on developing an Electronic Health Record (EHR) system for Nextvisit AI, aiming to streamline and simplify operations in private practices. This project is not just a venture but a passion for Dr. Rafiq, reflecting his commitment to integrating advanced technology with patient care to enhance the efficacy of psychiatric treatment.
