

How Amish Market cut shrink by 43% on the cameras they already had

COMPANY

Amish Market

Industry	Grocery
Location	New York City

Amish Market serves a high-traffic urban neighborhood with a wide range of everyday products.

01 THE CHALLENGE

Footage that only helped after the loss

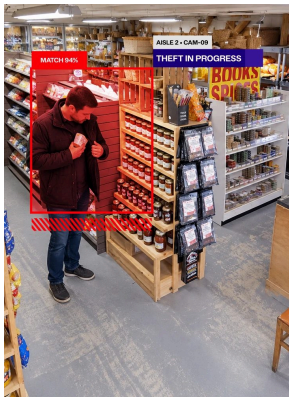

The store had the CCTV footage, but lacked real-time awareness. Reviewing incidents took hours, by which point the loss had already occurred.

IN THEIR WORDS

> We have started observing many shoplifters that we didn't before. Spacture AI has definitely surpassed my expectations

Tuncer Uygun
Store Manager, Amish Market

02 THE SOLUTION

AI on the cameras already in place

No camera replacement and no retrofit. The store kept its existing CCTV investment and added intelligence on top of it.

Real-time alerts and video search

The team is alerted during live incidents and finds footage by image timeline.

Behavior matching and insights

Recurring behavior patterns flagged, with foot traffic tracked alongside sales.

03 THE ROLLOUT

1 week

From kickoff to live alerts

Monthly on-site reviews with the store team have continued ever since, keeping the setup aligned with how the store actually operates day to day.

04 THE RESULTS

43%

Reduction in retail shrink

11%

Increase in store sales

The team went from reviewing incidents after the fact to catching them as they happened.
