[Personal Webpage](#)

Creative Developer & Entrepreneur with a visual design background, experienced in developing solutions with intuitive usage. An enthusiastic problem solver with a focus on delivering high-quality and user-centric products.

Professional Experience

[OutsideApp](#) — Co-founder

(Oct 2023 - Present)

❖ **Web UI** — OutsideApp

Part of the team working on the soon-to-be-launched OutsideApp, a social platform for user-tailored events discovery, event hosting, and ticketing service. I'm primarily responsible for designing (with Figma) and developing the UI components for Event listing and detail (including real-time activity updates), rendering for mobile and desktop web UI (using React).

[Mainor Ülemiste AS, Estonia](#) — Associate Project Developer

(July 2024 - Feb 2025)

❖ **Test City Service** — [Ülemiste City, Estonia](#)

I was part of the team responsible for developing and implementing the Test City Service concepts at Ülemiste City. My role focused on redesigning the Test City website, from wireframing to creating high-fidelity designs. I was involved in developing business strategies for project integration, directly coordinating with multiple project owners to align their innovations with the Test City platform. Additionally, I worked on community-building efforts such as designating a platform to drive engagement, outsourcing potential clients that aligned with the Test City model, and contributing to a yet-to-be-published article highlighting the key initiatives of Test City.

[Little Miss Robot, Belgium](#) — Product Engineer

(Oct 2022 - Nov 2023)

❖ **Web Application** — Openbedrijvendag, Belgium

Part of the team that developed the new web application for [Openbedrijvendag](#), a company that hosts corporate events for companies to showcase their products and internal

Technical Skills

Soft Skills

Fast learner, good communication skills, open-minded, enthusiastic, self-motivated, humble, teamwork oriented, and punctual.

processes to the general public. I was primarily responsible for designing the wireframes, brainstorming sessions, designing, and hands-on development of the application, with my main focus on creating a user-friendly navigation on and from B2B to B2C, as well as other design elements for the homepage.

Languages

English, Igbo

❖ **24/7 E-Learning platform & LMS** — [SDWorks](#) Europe

Part of the team responsible for building part of the [Academy 24/7](#) Learning Management System (LMS) platform and adding User Subscriptions to its list of existing pricing models. My role was primarily designing the user experience for the homepage and implementing the subscription add-on model in the LMS using React.

❖ **Design System** — University of Hasselt, Belgium

Part of the team tasked with rebranding [UHasselt](#) web portal. My primary responsibility was creating a Design System for the newly re-branded portal and creating the initial scaffolds/boilerplate web components using the design system.

❖ **JS Animations Libraries & Frameworks** — Unilin, Europe

Part of a team tasked with rebranding the web application for [Unilin](#), a multi-regional construction company based across Europe, in collaboration with their Belgium office. My role was to build motion animations for the newly rebranded web application using JavaScript animations.

❖ **Ride Sharing mobile app** — Slim-Naar Antwerp, Belgium

I was part of the team responsible for building the component used to get user feedback for [Slim naar Antwerpen](#) a ride-sharing and route-planning service in Belgium. My role was to create an intuitive user experience tailored to each trip's outcome and response generated by the user on the [mobile app](#).

Education
