

KADEUS presents "Avant la nuit", an ode to the final moments of summer

NEW SINGLE : Avant la nuit
RELEASE DATE : 14/08/2026

KADEUS, the Swiss electronic collective known for its cinematic and immersive universe, unveils "Avant la nuit", a new single available on August 14, 2026. Through luminous production blending electronic textures with organic melodies, the band captures the feeling of **summer's final days**, when the sunlight still lingers but the changing season is already in the air.

Conceived as a suspended moment in time, "Avant la nuit" celebrates the **simple experiences** that define summer: swimming, spontaneous dinners, conversations that last long into the evening, friends gathering together and sunsets that make time feel slower. Balancing childhood memories with shared moments, the song embraces the desire to fully **enjoy** the present before everyone goes their separate ways.

With "Avant la nuit", KADEUS invites listeners to savour the last rays of summer before the changing of the season, turning the end of summer into a **moment of freedom** and connection, all wrapped in a warm and uplifting aesthetic.
