

SOLAR FILM • UV SMOKE LIGHT SERIES

UV SMOKE LIGHT

A 2 mil solar film that cuts heat and glare before they hit the cabin, installed in a fraction of the time.

2 MIL / SOLAR FILM / 24" WIDTH

01

WHOLESALE PRICING

WIDTH	LENGTH	PRICE / ROLL (CAD)
24"	50'	\$700.00

Wholesale pricing, per roll. Subject to change without notice.

UV Smoke Light is a fast add-on for any install, not a separate appointment. At 2 mil it goes on quick, cuts UV exposure and heat transfer through the glass, and gives you a second line item on every ticket without adding a second day to the job.

WHY SHOPS STOCK IT

01 UV Ray Rejection

Blocks harmful UV rays that fade interiors and age dashboards prematurely.

02 Heat Reduction

Cuts solar heat transfer through the glass, so the cabin stays cooler.

03 Glare Control

Reduces glare through the windshield and side glass for a safer ride.

04 Fast Install

Thin 2 mil film applies quickly, an easy add-on to any bay appointment.

05 Clean Smoke Finish

A low-profile tint look that reads factory, not aftermarket.

06 Fade Resistant

Won't yellow or bubble over time, holding its finish season after season.
