RE: OKA - Proposed Scope & Next Steps

Dear Oli,

Thank you for sharing your vision for the OKA Gen-5 platform. We are interested in exploring how Cummins can support your requirements this sector.

Regarding the scope outlined in your email, we can confirm the following general capabilities:

1. Powertrain Integration

We have significant experience collaborating with OEMs on powertrain configurations. We are open to discussing a proposed package, subject to technical validation and commercial viability.

2. Lifecycle Support

Cummins maintains an extensive service network. We can discuss potential aftermarket frameworks to support your model.

3. Component Sourcing

We can review any component list once provided, to ascertain the availability of these component and what items we can supply.

4. Future Technologies

We are keen to discuss our technologies with you to see how they might align with your long-term planning.

Rather than a broad Memorandum of Understanding (MOU), we believe the appropriate next step is to work towards a definitive Supply Agreement.

This will allow us to specifically define the products, volumes, and commercial terms required to support your 2026 build and beyond. Please let us know if you are ready to receive a draft agreement or if you would prefer a commercial meeting first to settle the key terms.

We look forward to your response.

Kind regards,
