ABOUT ME

With over 5 years of experience in front-end development, I bring extensive training, education, and professional roles to the table. My expertise includes leading front-end projects, ensuring technical accuracy, and delivering high-quality, responsive web solutions. My background features hands-on experience in designing and implementing complex web applications.

WORK EXPERIENCE

Front End Developer, MASTER WiZR, Oslo - Norway
Nov 2021 - Present

At MASTER WiZR, my primary focus is front-end development, where I work across all company modules to ensure a consistent and high-quality codebase. I am deeply involved in setting and maintaining coding standards, which helps drive coherence and efficiency across our projects.

In addition to my development role, I lead project management, overseeing the technical aspects to ensure alignment with our goals. I also participate in research and strategic decision-making during the planning phases, contributing technical insights that shape our sales and marketing strategies. Currently, I lead a development team dedicated to one of our key products, where I guide the team in delivering top-tier results.

Key Contributions:

- Ensuring high-quality code across all modules as a front-end developer.
- Establishing coding standards to enhance project coherence and efficiency.
- Leading project management, aligning technical aspects with company goals.
- Contributing technical insights for strategic sales and marketing decisions.
- Guiding a dedicated team to deliver top-tier results for a key product.

Front End Developer, Caplend, Berlin - Germany
Feb 2024 - Jun 2024

At Caplend, my primary role was as a front-end developer, where I was deeply involved in a project that was heavily focused on data and functionality. My work required a strong emphasis on creating user interfaces that could seamlessly handle complex data interactions while ensuring the functionality was intuitive and accessible.

In this role, I was responsible for translating complex data sets into user-friendly interfaces, optimizing the performance of data-driven components, and ensuring that the front-end architecture supported the dynamic needs of the project. I also worked closely with back-end developers to integrate APIs and ensure that the data flow between the front and back end was efficient and reliable.

Front End Developer, Outkos, Prishtina - Kosovo
Nov 2020 - Sep 2021

My primary involvement at Outkos was as a front-end developer, where I played a pivotal role in developing and optimizing websites to ensure they were not only visually appealing but also highly functional. My focus was on creating reusable components and maintaining consistency across all web projects, contributing to a cohesive and efficient user experience.

In addition to my development responsibilities, I also took on the role of team leader. In this capacity, I guided my team in implementing best practices, fostering collaboration, and ensuring that all projects were delivered on time and met the highest standards of quality.

Key Responsibilities:

- Developed and optimized visually appealing, high-functioning websites.
- Created reusable components to enhance consistency and efficiency in user experience.
- Guided the team in implementing best practices and fostering effective collaboration.
- Ensured the timely delivery of projects, meeting the highest standards of quality.

EDUCATION

Computer Science and Engineering, UBT - University for Business and Technology, Prishtina - Kosovo
2018

During my bachelor studies, I actively engaged in projects and assignments that honed my technical abilities, particularly in front-end development. I also collaborated with peers on team-based projects, which allowed me to enhance my communication and leadership skills. My education at UBT equipped me with the tools and insights necessary to thrive in dynamic and fast-paced technological environments.

React JS, Cactus Education, Prishtina - Kosovo
2020

At Cactus, I participated in an intensive three-month training program focused on React.js. This program was designed to provide an in-depth understanding of React's core principles, advanced features, and best practices.

Throughout the training, I engaged in a series of rigorous workshops and hands-on projects that covered a broad range of topics, including component lifecycle, state management, and performance optimization. I gained practical experience in building complex, dynamic web applications using React, integrating APIs, and implementing responsive design principles.

Front-End Web Development, Cactus Education, Prishtina - Kosovo
2019

During a rigorous three-month intensive training program at Cactus, I focused on core front-end development skills, including in-depth training in JavaScript, HTML, and CSS, as well as advanced JavaScript concepts.

Was involved in Hands-On Projects: Engaged in practical projects to apply and reinforce learning. Built and styled web pages and applications, focusing on creating seamless user experiences and solving real-world development challenges.

AWARDS

Employee of the year, MASTER WiZR
Mar 2023

I was honored to be recognized as Employee of the Year, a distinction awarded to me out of 80 international staff members. This recognition was given in appreciation of my consistent commitment, exceptional performance across all product modules, and my role as a key discussion partner with the CEO and Creative Director. I am proud to have set a high standard for top producers and contributed significantly to our team's success.
