

PAEDIATRIC COURSES

RECORDED or IN-PERSON

Possibly the last time they will be presented in-person

PAEDIATRIC COURSES FOR OCCUPATIONAL THERAPISTS

1. Normal development of the infant looks in-depth at the physical development of the infant, and includes the communication, social and personal care skills. Beneficial in the grading of head, trunk and shoulder girdle control when working across all ages.
2. The assessment and treatment of the infant follows on from the normal development of the infant.
3. The assessment and treatment of the 1-3-year-old child.
4. The Learning and Play course explores learning theories, and unpacks play as an occupational domain, and how learning and play dovetail.
