- HTML/CSS
- JavaScript
- Blender
- Unity
- Game Design
- Team Collaboration
- Problem Solving

Education

Master of Science in User Experience Design

Jönköping University 2025 - 2026

My Master's gave me a deeper understanding of the science behind user experience, from cognitive psychology to behavioural patterns, helping me recognise the nuances that shape how people interact with digital products.

Bachelor of Science in New Media Design

Jönköping University 2022 - 2025

My Bachelor's provided a strong foundation in web design and development while also teaching me how to work well in team settings across various projects.

Experience

Teaching Assistant

Jönköping University 2025

I assisted students with JavaScript basics. I also got the chance to assist in delivering a lecture on programming concepts which strengthened my communication skills.

Marketing Intern

Anicca Innovations 2024

During my internship at Anicca Innovations, I explored diverse AI technologies and designed social media posts for the company's accounts, improving my skills in content creation and digital communication.
