

SYECHAN AL FARIZ

SOFTWARE ENGINEER

PROFILE

Hi, I'm Sye, a software engineer based in Yogyakarta. I'm passionate about creating digital solutions that allow individuals to explore and interact with virtual spaces in unique, personalized ways. With a focus on intuitive design and seamless functionality, I aim to craft experiences that not only meet user needs but also inspire curiosity and engagement.

Specializing in full-stack development, I enjoy the challenge of building scalable and efficient applications that push the boundaries of what's possible. I believe that by combining creativity with technical expertise, we can develop tools that make the digital world more accessible, meaningful, and fun to explore.

EXPERIENCE

2022 - Present

PT Vortex Buana Edumedia

Software Engineer

As a Software Engineer at PT Vortex Buana Edumedia, I develop and maintain full-stack applications, building scalable RESTful APIs and reusable UI components. Working in an Agile environment, I collaborate with stakeholders to implement data models, conduct user research, and perform comprehensive testing. My responsibilities include participating in the product development lifecycle while maintaining technical documentation and contributing to code quality through best practices and reusable libraries.

2020 - 2021

Qhomemart

Data Entry

As a Data Entry Specialist at Qhomemart, I was responsible for accurately entering product data into the company's internal system as part of the catalog digitization process. This included researching and gathering detailed product information such as descriptions, specifications, and images, and ensuring all data was correctly entered and maintained in the system. My role helped ensure the digital catalog remained up-to-date and accessible for internal use, supporting the overall product management process.
