PROFILE INFO

Software developer with a fire for Java and building robust, secure web applications using cutting-edge technologies like Spring Boot. I excel at problem-solving and have an insatiable curiosity for upcoming challenges. I'm driven to make a positive impact in the field by crafting scalable web solutions that empower users.

PROJECTS

Java SE17

github.com/Abdellahbounab/Httpserver (in progress)

HTTPServer

- A Java-based HTTP web server can be built using socket programming and multithreading to handle multiple clients. It parses HTTP requests, serves static files, and generates dynamic content. Security and performance are crucial considerations.

SpringBoot / Angular / MySQL

github.com/Abdellahbounab/edutasker

Edu'Tasker

- A web platform for schools using MVC, JPA, and Spring Security to manage users, assign work, customize interfaces, and securely handle data. Key features include role-based access, efficient workflows, centralized administration, and scalability.

Java Swing / MySQL

github.com/Abdellahbounab/Javatm

JavAtm

- A Java ATM application, utilizing Swing for a user-friendly interface and MySQL for secure data storage, enables users to create accounts, perform transactions like deposits, withdrawals, and transfers, and modify their passwords.

C/C++

github.com/Abdellahbounab/Darijashell

DarijaShell

- DarijaShell is a C-based command-line interface that aims to simplify common shell commands by incorporating Darija slang terms. It provides a user-friendly experience, especially for those familiar with the Moroccan Darija dialect.

EDUCATION

2022 - Now | SUP'ISI Tetouan

Bachelor degree, Computer Engineering

2024 - Now | UM6P - 1337 MED

Associate's degree, Computer science

SKILLS

- Java / JEE
- SpringBoot
- C/C++
- Multithreading
- Angular 17
- MySQL
- Docker
- GIT
- UML/Merise
- JavaScript
- PHP

LANGUAGES

- English
- Arabic (Native)
- French
- Spanish (Basics)

CERTIFICATIONS

Oracle Certified Professional

Java SE 17 Developer

Dec 2024
