

Offer payments. Deploy anywhere. Monetise at scale.

A complete payment solution for SaaS platforms and resellers across Europe, from OPP and SUNMI.

Are payments and compliance holding back your growth?

25%

of SaaS companies spend 5–9% of their annual revenue on payments, billing and compliance infrastructure.

5 days

Cut onboarding time in half and boost activation by 40%.

7.2 min

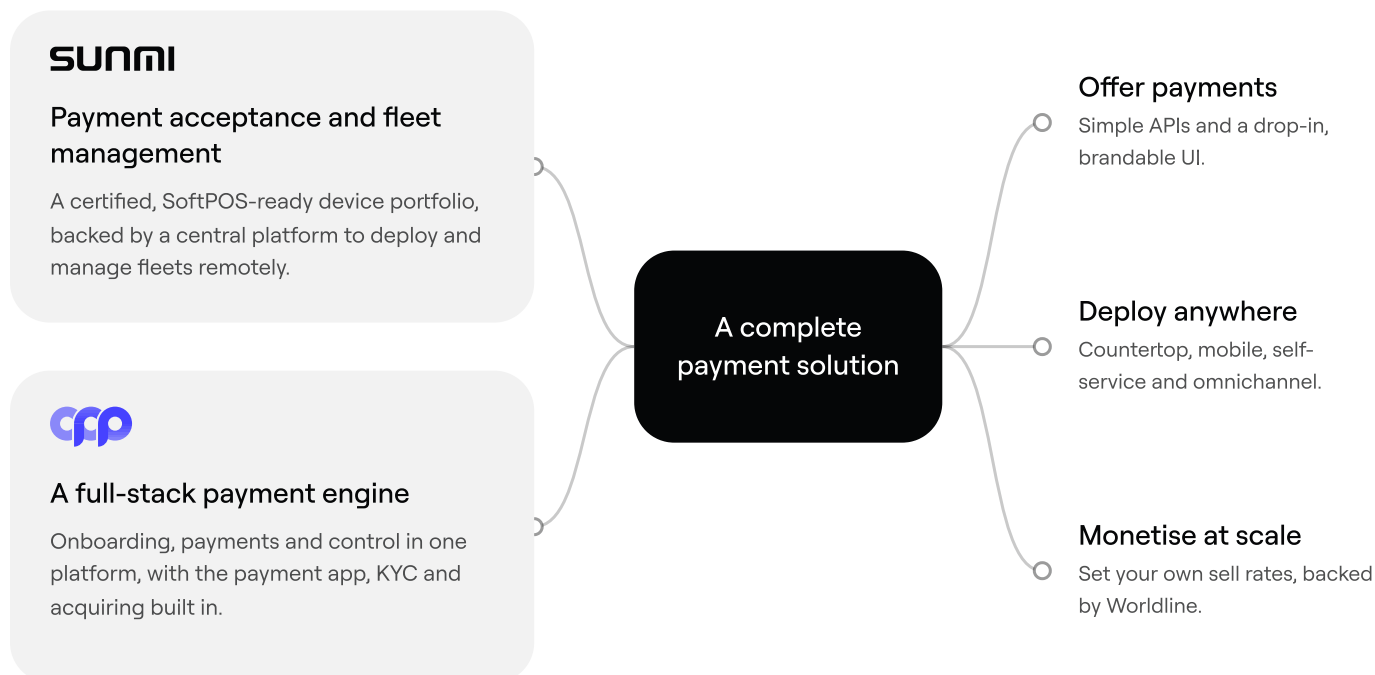

Before +25%

Average onboarding completion time for fintech apps, leading to 25% higher retention.

Figures supplied by SUNMI.

Scale your business with end-to-end payment orchestration

Together, OPP and SUNMI deliver a complete payment ecosystem: full-stack payment infrastructure combined with a comprehensive portfolio of SoftPOS-ready smart devices.

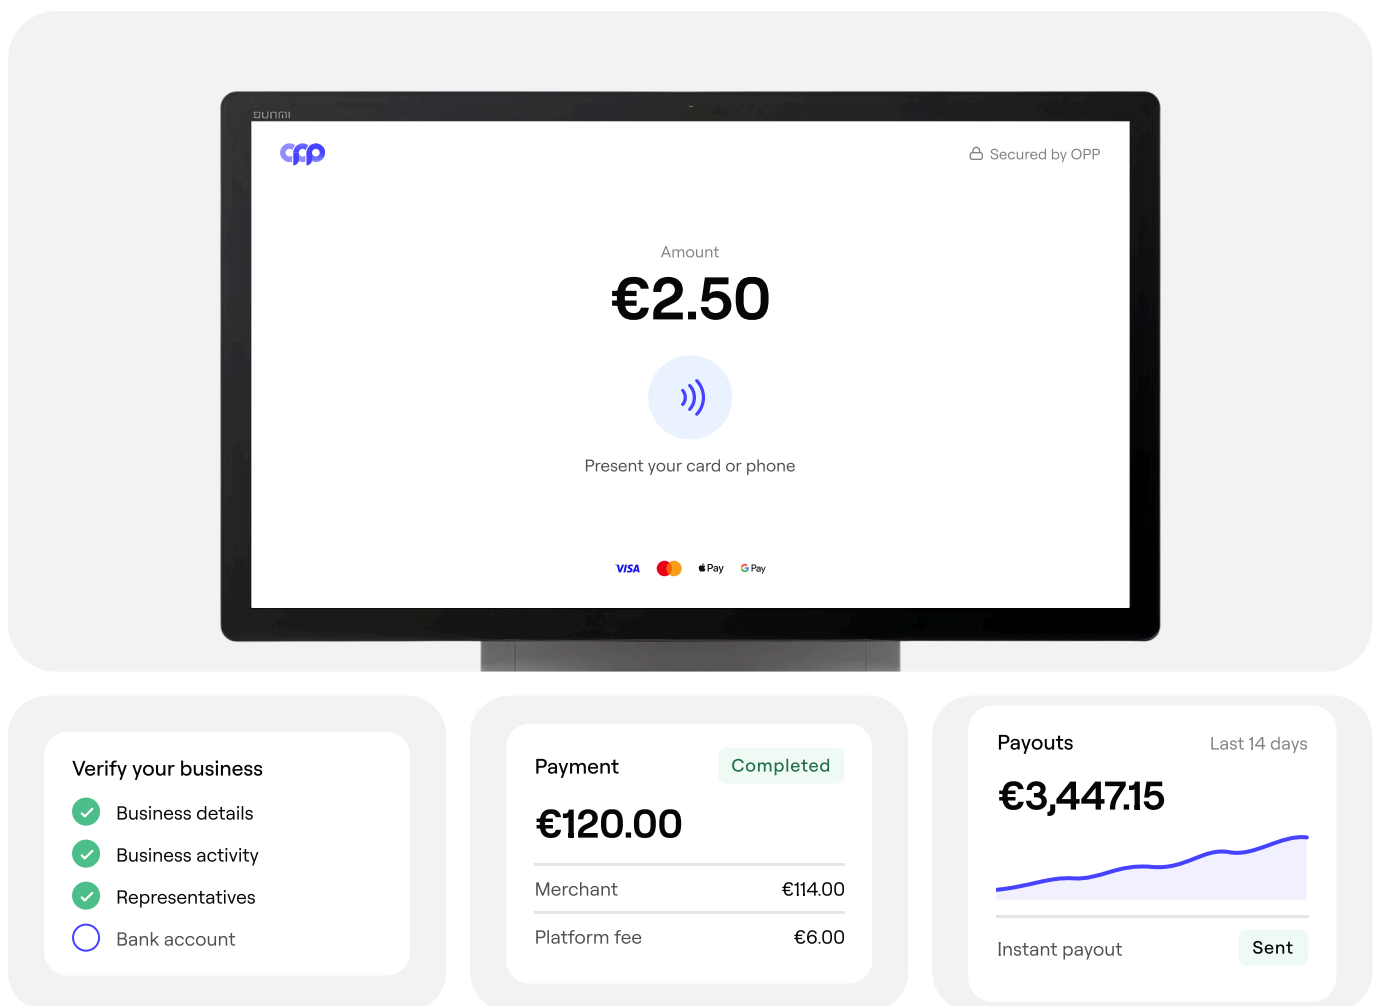

“The great strength of the partnership is that we can now offer a complete payment platform with online and mobile payments, right up to point-of-sale transactions.”

Rick Bertoen · Co-founder, Retaildesk

Payment orchestration

Onboarding, payments and control, managed from one platform.

Onboarding

Merchant onboarding with automated business verification, document collection and configurable flows. Activate merchants quickly, with a smooth and compliant experience.

Payments

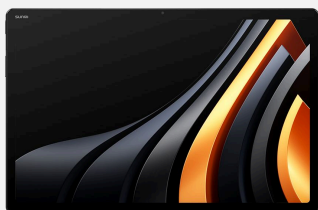

Accept and process payments across channels through a single platform. Support multiple payment methods, escrow and split payments, with reliable processing at scale.

Control

Manage the full payment lifecycle with real-time dashboards, transaction monitoring, reporting and automated payouts, all from one environment.

Smarter devices. Faster rollouts. Better control.

SUNMI devices: an ecosystem of Android POS, ready for SoftPOS.
