SUMMARY

UI/UX Designer with experience across product, web, and digital design. I combine UX research, interaction design, prototyping, design systems, and strong visual execution to create clear and engaging digital experiences. My background spans AI-powered products, healthcare technology, and international digital projects.

SKILLS

UI/UX

UI/UX Design, Landing Pages, User Flows, Wireframing, Prototyping, Design Systems, Conversion-Focused Design, Visual Hierarchy, Responsive Web Design.

TOOLS

Figma, Adobe Creative Suite (Photoshop, After Effects, Premiere Pro), Framer

LANGUAGES

English - B2/C1, Russian - Native

PROFESSIONAL EXPERIENCE

UX/UI Designer

Jan 2025 – Present

AllrisDX - Medical AI / Healthcare Technology Startup

- Designed the UX/UI of an AI vision product for gastroenterologists from scratch, covering competitor research, doctor interviews, user flows, prototypes, final interface, and UI Kit for a tool tested in a real clinical setting.
- Proposed and designed a timeline-based navigation feature that became a core part of the product experience, enabling physicians to quickly identify and review AI-detected findings.
- Reduced medical report completion time from around 20 minutes to 3–5 minutes in clinician validation sessions by introducing AI-assisted report generation workflows
- Created the landing page and supporting visual materials, helping the startup present the product clearly and attract investor attention within the first 5 months.

Independent UI/UX Designer

Oct 2025 – Feb 2026

- Identified structural UX issues that increased cognitive load on a corporate AI and cloud technology website, proposed a full UX/UI redesign, and convinced the client and CEO to adopt a clearer visual direction later expanded across other company materials.
- Designed new pages and components for a separate Telegram Mini App for investor networking, while consolidating fragmented design system patterns across production screens, Figma files, and outdated documentation.

Web Designer

Nov 2022 – Jan 2025

AdCombo - Affiliate Marketing Platform

- Designed new landing pages and reworked existing ones for international advertising campaigns, turning briefs into clear, structured, production-ready web layouts.
- Created banners, digital creatives, and supporting visual materials, adapting visual hierarchy and messaging for different offers, audiences, and markets.

Freelance Web Designer

Oct 2018 – Oct 2022

- Structured and designed websites, banners, and promotional visuals for small business clients, including a logistics company and a psychologist, translating their services into clear online presentations and adapting visual messaging to different business contexts.
