

Education

University of Arkansas
BFA in Graphic Design
Minor in Art History

Fayetteville, AR
May 2023

Professional Summary

Product Designer with a background in enterprise software, focused on delivering user-centric solutions that align with business goals. I use AI in my workflows only when it clearly adds value. I'm committed to thoughtful use of AI and learning how it shapes the future of product design.

Experience

Tyson Foods	Springdale, Ar
UX Designer	June 2023 - February 2025
- Redesigned a 1997 legacy application that handled sales orders and inventory for fresh products, delivering final designs to developers and achieving strong UAT results. - Contributed to the redesign of the customer-facing Tyson brand site, leveraging AEM components, ensuring consistency and scalability. - Co-designed and launched the first version of the UI Kit for internal web applications, establishing a cohesive visual component library. - Applied a range of user research methods, such as interviews, usability testing, and surveys. - Facilitated office hours to support cross-functional teams with UX guidance and best practices.	
Tyson Foods	Springdale, Ar
UX Design Intern	Jun 2021– Aug 2021 May 2022– May 2023
- Assisted in auditing and organizing the design system working file. Identified inconsistencies, improved documentation, and reviewed adoption and usage needs. - Built base UI components and worked on styles. - Participated in critique sessions to provide and receive actionable feedback.	
SupplyPike	Fayetteville, Ar
Graphic Design Intern	Sep 2021 – May 2022
- Branded slide decks and documents to align with existing brand identity. - Expanded the style guide by introducing new patterns and custom illustrations. - Honed my motion graphic skills working closely with a senior designer. - Designed business cards for all in-office employees.
