Professional Summary

UX/UI Designer specializing in scalable design systems and end-to-end solutions for B2B SaaS, fintech, and AI products. Combines user research with strong Figma and Framer skills to create accessible, high-performing interfaces aligned with business and user needs.

Work Experience

UX/UI Design (Intern)

(Sep 2025 – Dec 2025)

Arcitech.AI

- Worked with an international client to design and deliver a website, coordinating with stakeholders and developers.
- Created a design system and conducted UX research for a BPO project, designing screens that supported new client onboarding.
- Designed UI for multiple SaaS and platform-based products including Haire, BPO Box, AG Brain, Rafeeq, and Sharc.
- Worked on projects across different sectors, including the BPO industry and recruitment platforms.
- Created user flows and interactive prototypes, ensuring usability and consistency with the design system.
- Ensured timely delivery of prototypes, research outputs, and developer handoffs

UX/UI Design (Fulltime)

(Jun 2025 – Aug 2025)

Intellect Infotrade Pvt Ltd

- Designed a complete Automobile Service Software from scratch, including user journeys, wireframes, and high-fidelity screens for service teams and customers.
- Designed and delivered the Finiyu CRM dashboard, creating interactive prototypes based on business requirements
- Improved the usability of products such as SkyCRM and Finiyu by addressing design gaps and maintaining visual consistency
- Created user flows and prototypes based on client requirements, collaborating closely with clients
- Maintained and refined a consistent design system to ensure cohesive UI across all software products.

UX/UI Design (Intern)

(Dec 2024 – Jun 2025)

Intellect Infotrade Pvt Ltd

- Conducted user research for an Automobile Service Software, defining user journeys and requirements for service teams and customers
- Managed design work independently, handling software products and client projects from concept to final UI
- Designed and built a no-code website in Framer, collaborating closely with clients throughout the process
- Created dashboard flows for the Finiyu software to help users better understand company data and workflows
- Ensured timely delivery of design projects by coordinating with developers and clients and managing revisions
