

Quick-start guide.

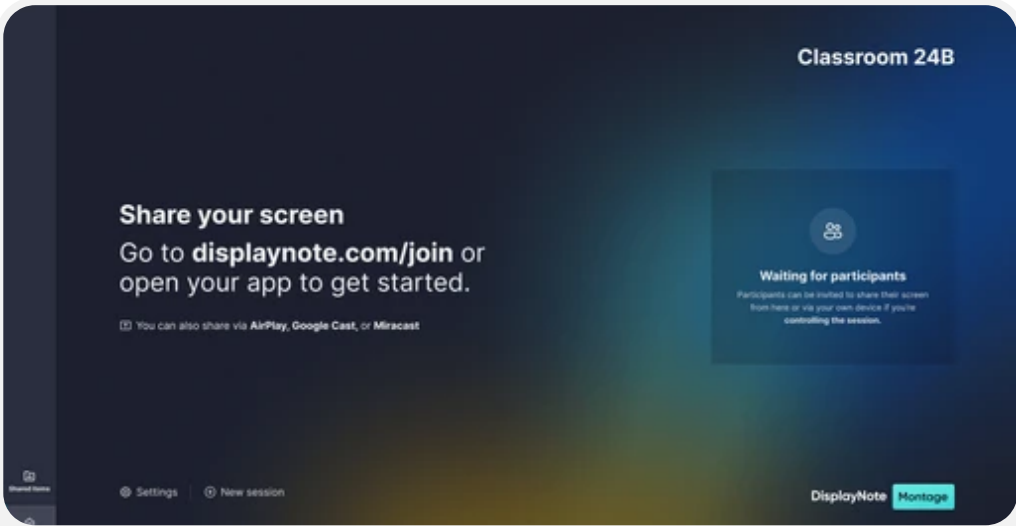

Everything you need before your first class, on one page.

What's new this term.

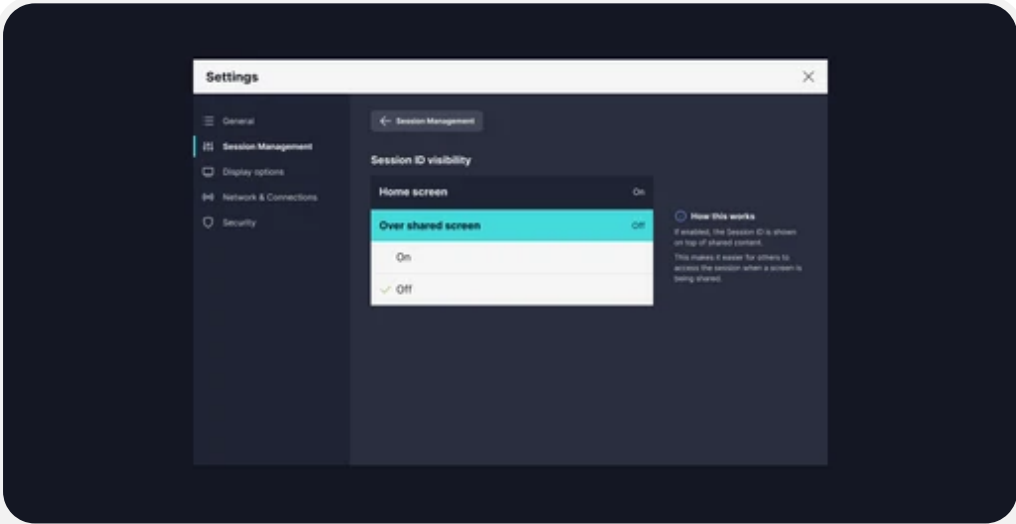

One ID for every session

A single persistent session ID for a quicker connection. Off by default, turn it on in Settings > Session ID.

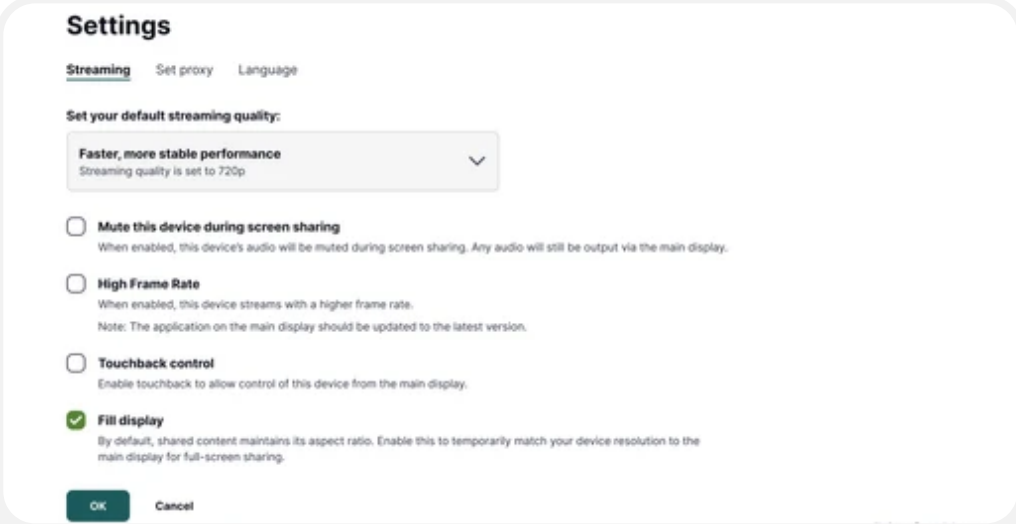

Hide your session ID when idle

Keeps joining instructions off the home screen until you're in a session. Settings > Session ID > Session ID Visibility, Home screen to Off.

Turn off the ID overlay while presenting

Clears the code from on top of shared content. Settings > Session ID > Session ID Visibility, Over shared screen to Off.

Fill Display for edge-to-edge sharing

Shared content now matches your main display, with no black bars down the side. Enable Fill Display in your DisplayNote desktop app settings.

Before your first class.

Update devices and apps

Check for update prompts on your home screen and the DisplayNote desktop app.

Check Wi-Fi and network

Make sure your device and main display are on the correct network.

Turn on Moderator Mode

Settings > Session Management, for control over who can present.
