

Atharva Harne

UX Design Service Design

About me

Two years of UI Design taught me a lot but mostly it taught me what I was missing. I wanted to understand people before I designed for them, to look at the whole system rather than just the screen. Pursuing a Master's in UX Design at Avantika University opened me up to Service Design, and it clicked immediately, the fieldwork, the conversations, the discipline of knowing the why before reaching for the how. Along the way I've found my shape as a designer – research-driven, someone who tells stories with data and cares deeply about crafting experiences that feel genuinely human. I'm now looking for an internship where I can dig into that end-to-end human problem space.

Experience

2024 – 2026 Hyderabad

UI Designer
Jamme

- Led full UX and UI redesign of a voice-based social app, research, flows, and UI, from identifying drop-offs to shipping improvements.
- Rebuilt user journeys and wireframes to simplify navigation and reduce cognitive load.
- Ran usability testing sessions and fed findings directly into iterative design updates.
- Grew the app to 10k+ downloads and a 4.5★ rating on the Google Play Store.

Apr 2024 – Dec 2024 Hyderabad

UX & UI Designer
Anvi Robotics

- Built a design system to ensure visual and interaction consistency across products.
- Conducted competitive research to inform product and interaction decisions.
- Collaborated with engineering and 3D teams to align UI with physical product renders.
- Standardized design-to-development handoff processes across the team.

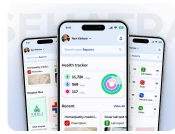

Nov 2022 – Feb 2024 Hyderabad

UX & UI Designer
IPVerse

- Interned for a year before earning a full-time offer, based on ownership and design quality.
- Designed end-to-end UI/UX for Ahaverse, a metaverse platform built for Aha OTT.
- Contributed to Kahaniya's UX research, flows, and visual UI, a platform with 30k+ users and a 3.9★ rating.
- Ran usability testing with 30+ participants, iterating on flows based on findings.

Latest projects

Sehatra

Sehatra is an app aimed to reduce the friction of carrying hospital files.
